REQUIREMENT HTA/SI/R10/56: Locate and describe reported torpedo test range or torpedo storage facilities in the vicinity of Sestroretsk, USSR.

REMARKS:

Sestroretsk is located approximately 15 miles northwest of Leningrad near the shore of the Gulf of Finland.

[redacted] photography of Sestroretsk Zaliv and the coastal area within 10 miles of Sestroretsk was studied in an attempt to locate a reported torpedo test range or torpedo storage facilities.

Although positive confirmation is not possible from a study of this photography, an isolated military installation at the tip of Cape Lisiy Nos, five miles south of Sestroretsk, might be engaged in torpedo storage and testing activity. This installation is not new. It is evident on [redacted] photography, but a new revetted building has been constructed since [redacted] and the installation appears active on [redacted] photography. The railroad spur which served the installation during the war appears to be still in use.

The principal components of this installation are as follows:

1. A two-story building, 135'x 70', completely surrounded by a 15' wide, approx. 10' high, earth revetment. This building and revetment appears on [redacted] photography.

2. An area, 300'x 90', enclosed on three sides by a 25' wide, approx. 20' high earth revetment. Within this revetted area are three, one-story buildings measuring approximately 110'x 30', 55'x 20', and 35'x 20'. These buildings, visible on World War II photography, were completely camouflaged by natural vegetation on the [ ] photography. However, a road leading to this revetted area appears to be in use so it may be assumed that the buildings are still present.

- 25X1D
3. A new one-story building, 60'x 30', completely revetted, has been constructed [ ]

25X1D

An 800'x 40' finger pier extends from Cape Lisiy Nos. During World War II this pier was 1800' feet long; [ ] photography indicates that the seaward end of the pier has deteriorated and there is a 375' wide gap near the center, limiting the effective length of the pier to 800'.
